- Masters of Business Administration
  Major in Supply Chain Management
  University of Chittagong

- Bachelor of Business Administration
  University of Chittagong

- Higher Secondary School Certificate
  Science Group
  Govt. City College, Chittagong.

About Me

I am a full-stack developer with extensive experience building ERP systems for industries like container shipping, healthcare, ISP, and bulk carriers. I specialize in frontend and backend development using Laravel, Vue, and a little React, with skills in API development, **IoT integration**, and server deployment **automation**. I've also handled **payment gateway** integration and **WebSocket** for push notifications.

In addition to development, I have strong **cybersecurity** expertise, reporting vulnerabilities and securing corporate systems. I contribute to open-source projects and have developed **android apps** and **chrome extensions** for the **Muslim** community. My **reverse engineering** work focuses on data extraction and application security.

Professional Experience – Full Time

Magnetism Tech Limited | Senior Full Stack Developer
September 2021 - Present

Contributions:
- **Container Shipping ERP**
  - **EDI Parser**
  - RESTful APIs and Vue Frontend
  - Server Deployment Automation - **Git Hook**.

- **Bulk Carrier ERP**
  - RESTful APIs and Vue Frontend
